Subject: Agricultural Limestone sample results.

Dear Joe,

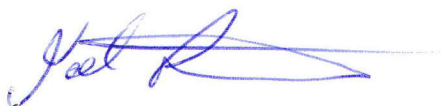

Analysis of the limestone samples tested by Sibelco Lilydale on the 02/02/16 yielded the following:

Description	Dirt Fert Limestone sample
% Moisture	3
% Calcium, Ca	33
% CaCO ₃	82
% Magnesium, Mg	< 1
% MgCO ₃	1
Neutralizing Value, NV	85
% > 1 mm	8

Notes:

- NV by AOAC method 955.01 Neutralising Value for Liming Materials.
- Moisture by Mettler-Toledo HB43 moisture analyser.
- Ca and Mg by XRF.
- Sample wet sieved at 1mm.
- Chemistry results on dry weight basis.
- Chemistry, sizing and moisture results rounded to nearest whole number.
- NV rounded to nearest multiple of five.

Regards,

Noel Letcher.
